

2012
ISSE

23rd & 24th October 2012
MCE, Brussels, Belgium

www.isse.eu.com

Europe's only independent, interdisciplinary security conference and exhibition

Over the past decade, **Information Security Solutions Europe (ISSE)** has built an unrivalled reputation for its world-class, interdisciplinary approach and independent perspective on the e-security market.

This year, ISSE will take place on 23rd & 24th October in Brussels. Regularly attracting over 350 professionals and industry experts who will come together for a unique all-encompassing opportunity to learn, share and discuss the latest developments in e-security and identity management.

Key areas covered by ISSE's multi-track programme include:

- > Digital Agenda
- > Cloud Computing Security
- > Public Cloud Challenges
- > Trustworthy Infrastructures
- > Embedded Security
- > Mobile Security Solutions
- > Identity and Access Management
- > e-ID and e-Sig Applications
- > Security Management and Economics of Security
- > Awareness and Education
- > Privacy and Data Protection in Cyberspace
- > Network Wireless and Endpoint Security
- > Hackers and Threats
- > e-Government – Policy and Governance
- > Enterprise Security Services
- > Critical Infrastructure Protection and Physical Security
