

TeleTrust

Welcome to TeleTrust

The IT Security Association Germany (TeleTrust) is a widespread competence network for IT security comprising members from industry, administration, consultancy and research as well as national and international partner organizations with similar objectives. With a broad range of members and partner organizations TeleTrust embodies the largest competence network for IT security in Germany and Europe. TeleTrust provides interdisciplinary fora for IT security experts and facilitates information exchange between vendors, users, researchers and authorities. TeleTrust comments on technical, political and legal issues related to IT security and is organizer of events and conferences. TeleTrust is a non-profit association, whose objective is to promote information security professionalism, raising awareness and best practices in all domains of information security. TeleTrust is carrier of the "European Bridge CA" (EBCA; PKI network of trust), the IT expert certification schemes "TeleTrust Information Security Professional" (T.I.S.P.) and "TeleTrust Professional for Secure Software Engineering" (T.P.S.S.E.) and provides the trust seal "IT Security made in Germany". TeleTrust is a member of the European Telecommunications Standards Institute (ETSI). The association is headquartered in Berlin, Germany.

We enable members to share experiences and best practice by holding meetings and conferences, by facilitating working groups who produce reports on topical subjects and by helping members to connect with the right person to help solve business issues or develop beneficial business relationships.

TeleTrust works with its national and international members, governmental bodies, standards organizations and interoperability initiatives. TeleTrust's remit is to educate and inform on the latest developments, at the same time enabling its members to compare their views.

The work produced by the association with its members (projects, papers, working group meetings, tutorials, reports etc.) is funded by both membership subscriptions and revenue generated through fee-paying events.

Membership advantages

- Opportunities to network with diverse members and non-members
