

# TeleTrust-EBCA "PKI-Workshop" 2022

Berlin, 29.09.2022

## Digital Signature vs. Electronic Signature

Elena Stoycheva, Uniper

# The long way from Standard to Digital. Digitalization as a state of mind.

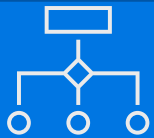

# Traditional way of using digital signatures vs. new Cloud signature platforms

Digital Signature on PKI token	Electronic signature (SeS, AeS, QeS)
Signing of emails	No signature via email
Signing of PDF documents	PDF forms migration to cloud signature platforms
Signing of AIF	SAP processes readjustment
Signing of reports integrated in various systems	Change of the signing process
No usage on mobile	Available on mobile for signature
Bad UX with token issuance	User friendly UX
Signature on HW token	No hardware anymore

# Challenges with digitalization

PKI token is in Uniper DNA

Huge number of processes depending on PKI

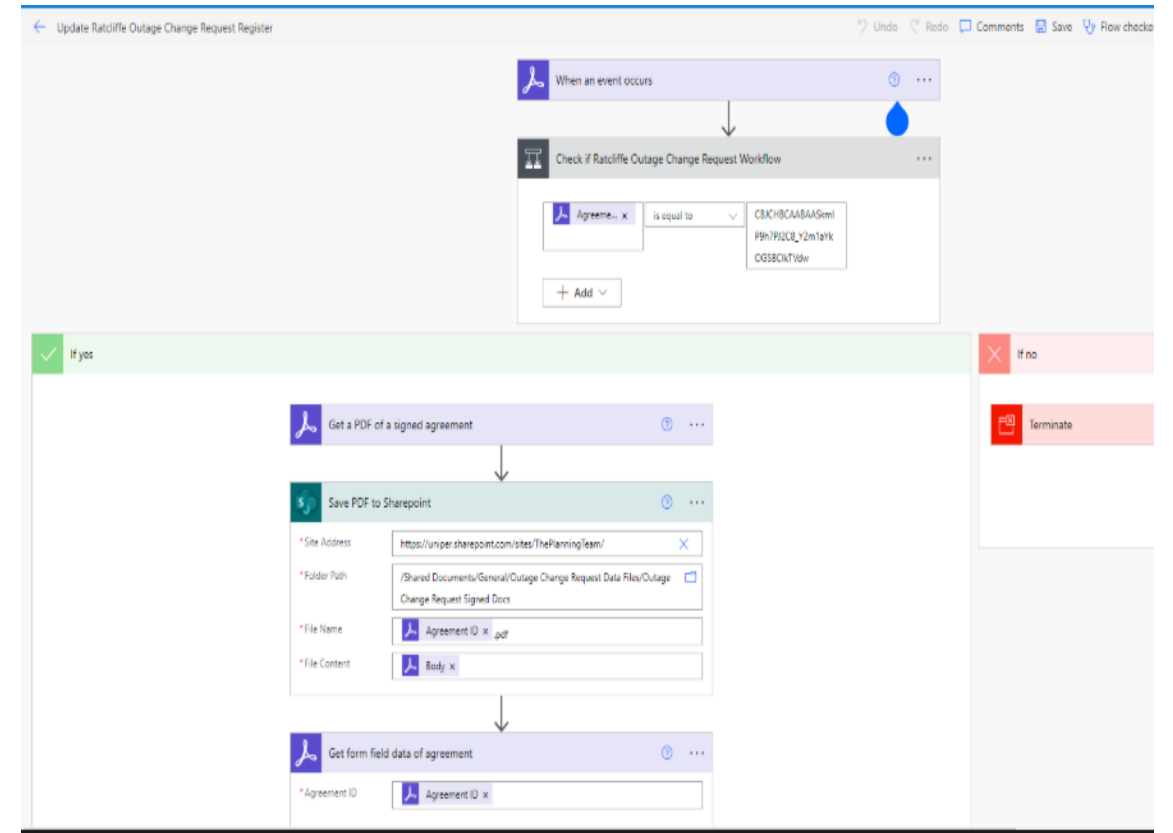

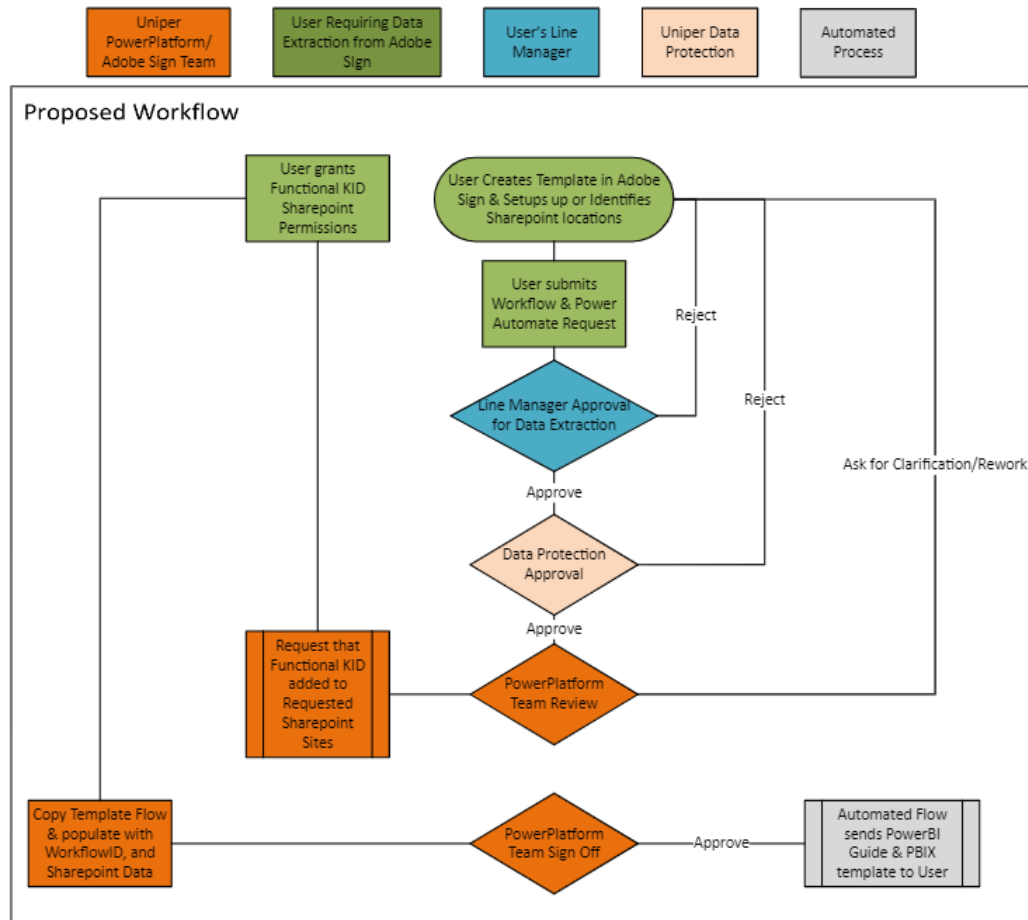

Many outdated applications not compatible with new technologies

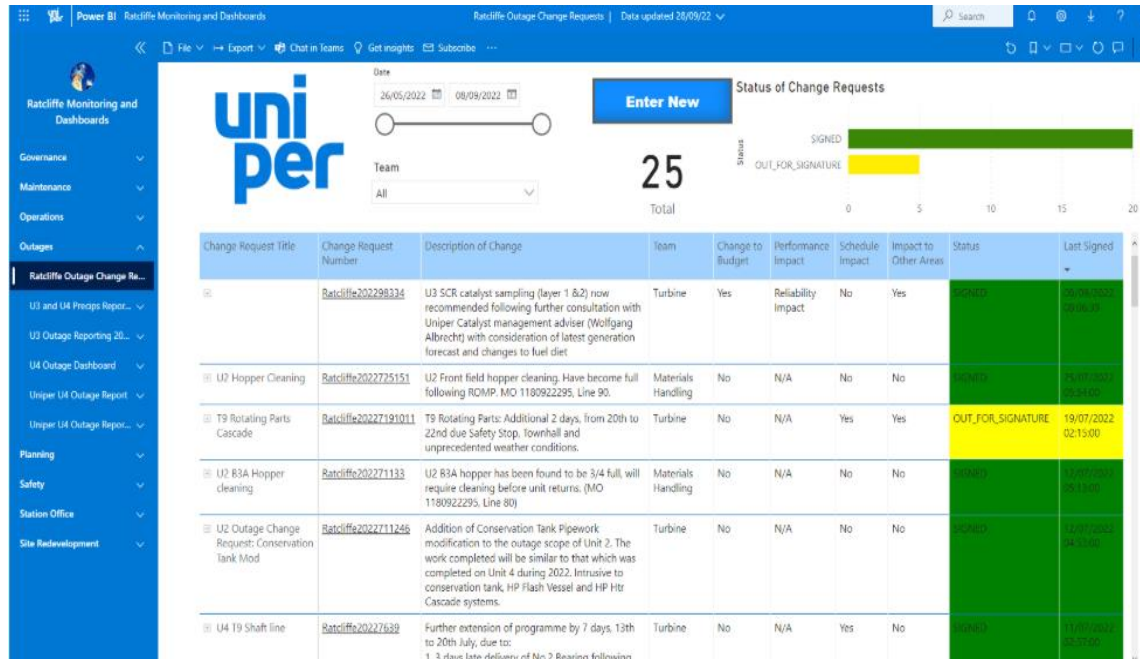

Education of the employees

# Utilization of the cloud platforms for automation processes

# Utilization of the cloud platforms for automation processes

## Steps:

The flow stores the data for each and every signature

PowerBI SharePoint Folder Connector combines them all effortlessly with minimal set up

Change the workflow ID and the Sharepoint folder locations on this and the flow will work for any Template to extract the data

Audit Trail is available who signed what and when

Thank you! 😊
